Organic pig feed production plant	66-68
Unit for processing fruits and vegetables into jam, cosmetic products...	69-71
Creation of a rice complex in the center of the Côte d'Ivoire	72-74

Accelerate Côte d'Ivoire's economic and social transformation and join the upper middle-income countries by 2030

National Development Plan 2021-2025,

HEM. Alassane OUATTARA

President of the Republic of Côte d'Ivoire

“

The 2030 vision of the President of the Republic, His Excellency Mr Alassane Ouattara, is the compass that guides the Ivorian government in its ambitions for a prosperous Côte d'Ivoire with a developed and competitive private sector.

The government has therefore adopted reforms to facilitate the procedures for acquiring and managing industrial and real estate, which are necessary to attract domestic and foreign investment, which are essential for creating wealth and jobs for young people and for the structural transformation of our economy.

The industrial potential in the agricultural sectors, supported by the launch of several competitive value chain projects, will be an asset for the modernisation of agriculture and the foundation of our country's economic emergence by 2030.

”

Mr. Patrick ACHI

Prime Minister of the Republic
of Côte d'Ivoire

I-Words from CEPICI's CEO

Mrs. Solange AMICHIA

Chief Executive Officer CEPICI

More than a promotion agency, an economic development agency

// As a one-stop shop for investment in Côte d'Ivoire, CEPICI is at the service of economic operators, the administration and local economic operators, the administration and local authorities. Through its role in promoting direct investment in Côte d'Ivoire,

it mobilizes private investment in line with the objectives of the Côte d'Ivoire Investment Plan in terms of impact on GDP and value creation.

A strategic tool

Since 2013, CEPICI has been supporting the government in its efforts to improve the business climate and conditions for investment development and, more recently, to expand the scope of reform projects.

The short-term objective is to provide the country with a barometer to assess the business climate and an econometric model to evaluate the impact of reforms, either prospectively or reality.

Our strategic plan to promote private investment is linked to the Pillar N° III of the National Development Plan 2021-2025, estimated at 59,000 billion CFA francs, of which approximately 43,000 billion CFA francs, or 74%, should be financed by the private sector attracted by CEPICI.

A true transmission belt

There are many reasons why investors should choose Côte d'Ivoire. Whether it's the business-friendly environment or the specific factors related to value chains, infrastructures, and human capital, it is the country's diversity and openness that allow companies from all countries and sectors to find their place and thrive in the Ivorian market. We are committed to promoting direct investment in Côte d'Ivoire.

CEPICI plays a key role in attracting and facilitating investment and sustainable job creation by rising awareness of the wide range of investment opportunities in the country and facilitating the necessary links between investors and the private and public sectors.

HEM Patrick ACHI, Prime Minister of the Republic of Côte d'Ivoire and Mrs. Solange AMICHIA, CEO of CEPICI at US-CI forum «Invest in Côte d'Ivoire»

HALIEUTIQUE PARK

22,865,854 Euro

CEPICI projects (Investments promotion agency of Côte d'Ivoire)

Halieutique park

1. Project title	Fish park
2. Type	Private
3. Sectors / Industry	Livestock / Fishery products
4. Promoter	CEPICI
5. Contacts	+ 225 27 20 311 400 / opportunités-projets@cepici.ci
6. Project description	
6.1 Execution zone	South-East of Côte d'Ivoire, TAABO
6.2 Context	<p>Among fisheries resources, fish is the main source of animal protein for the Ivorian consumer with a per capita consumption of approximately 24.9 kg/year/inhabitant. In fact, 600,000 tons of fish are consumed locally per year while the country only produces 100,000 tons of fish. Thus, there is an annual deficit of 500,000 tons of fish which is made up by fish imports. Added to this are the needs of restaurant owners, particularly in terms of shrimp, lobsters, oysters, various shellfish and seafood products.</p> <p>It is within this framework that the fishery park project was born in the TAABO area over an area of 76 hectares. The TAABO department is known for its hydroelectric dam, it has 2 rivers, the NZI and the BANDAMA with artisanal fishing activities.</p>
6.3 Problem to be solved	Annual deficit of 500,000 tons of fish
6.4 Purpose of the project	<ul style="list-style-type: none"> - Fill the deficit of 500,000 tons of fish - Contribute to food and nutritional security - Reduce foreign currency outflows linked to imports
6.5 Economic profitability	Study in progress
7. Project components	<p>Component 1: Seafood production and fishery (fish, shrimp, lobsters, oysters) in ponds and rivers</p> <p>Component 2: Construction of an industrial seafood processing unit (canned, frozen and fresh)</p> <p>Component 3: 10 modern ovens for drying fish</p> <p>Component 4: Construction of an industrial grain ice production unit</p>

Halieutique park

7. Project components	<p>Component 5: Construction and operation of a fish feed production unit with a capacity of 1t/h on 0.5 ha</p> <p>Component 6: 1 training center for professions linked to the production and processing of fishery products</p>

10 MODERN OVENS FOR DRYING FISH

260,000 Euro

CEPICI projects (Investments promotion agency of Côte d'Ivoire)

10 modern ovens for drying fish

1. Project title	Fish Breeding Feed Production Plant
2.Type	Private
3. Sectors / Industry	Livestock/fish
4. Promoter	CEPICI
5. Contacts	+ 225 27 20 311 400 / opportunités-projets@cepici.ci
6. Project description	
6.1 Execution zone	TAABO
6.2 Context	In recent years, The Fisheries Resources sector has seen a remarkable upturn due to investments made by both the State and the private sector. The Government has developed production, processing and marketing infrastructure and improved the sanitary environment in order to ensure sustainable growth in the sector. However, there are still many in fish processing, particularly in fish drying techniques. In fact, the majority of players use traditional techniques, justified by their low income and standard of living. According to the FAO, this results in production losses of between 20 and 50% and has a negative impact on consumer health.
6.3 Problem to be solved	<ul style="list-style-type: none"> - Traditional method of drying fish - Loss of production
6.4 Purpose of the project	<ul style="list-style-type: none"> - Improving the quality of dried fish by using modern ovens - Improving food and nutritional safety for consumers
6.5 Installed capacity	100 Tons per day
6.6 Economic profitability	Study in progress

10 modern ovens for drying fish

INTEGRATED POULTRY CENTER

931,707 Euro

CEPICI projects (Investments promotion agency of Côte d'Ivoire)

Integrated poultry center

1. Project title	Fish farming
2. Type	Private
3. Sectors / Industry	Livestock / Poultry farming
4. Promoter	CEPICI
5. Contacts	+ 225 27 20 311 400 / opportunités-projets@cepici.ci
6. Project description	
6.1 Execution zone	South-East of Côte d'Ivoire (TAABO, TIASSALE)
6.2 Context	<p>The Ivorian State has put in place a Strategic Poultry Recovery Plan (PSRA) for the period 2011-2020, worth around 150 billion CFA francs. Thus, this plan allowed Côte d'Ivoire to increase its poultry production from 67,715 tons (98.9% TC) in 2016 to 74,297 tons (98.8% TC) in 2019. The analysis diagnosis reports a drop in production which can be explained by the difficulty in regular supply of balanced and quality food on the local market. Thus, the State wishes to revitalize this sector and achieve a production of 200,000 tons of chicken meat and 3.7 billion units of eggs by 2030. This integrated poultry project (food production, hatchery day-old chick, poultry farm, chicken slaughter unit) constitutes an investment opportunity to be seized. In fact, it is a 16-hectare complex bringing together all the activities of the poultry industry value chain. These activities will be managed as a franchise.</p>
6.3 Problem to be solved	Insufficient regular supply of poultry throughout the territory
6.4 Purpose of the project	<ul style="list-style-type: none"> - Contribute to food and nutritional security - Increase local chicken production to meet the growing demand for this meat on the domestic market. - Reduce foreign exchange outflows linked to frozen poultry imports.
6.5 Economic profitability	Study in progress
7. Project components	<p>Component 1: Construction of a day-old chick hatchery Component 2: Construction of a 195,000 head farm Component 3: Operation of the farm and hatchery Component 4: Construction and operation of a chicken slaughterhouse</p>

Integrated poultry center

Modern poultry slaughterhouse

1. Project title	Modern poultry slaughterhouse
2. Type	Private
3. Sectors / Industry	Livestock / Fish
4. Promoter	CEPICI
5. Contacts	+ 225 27 20 311 400 / opportunités-projets@cepici.ci
6. Project description	
6.1 Execution zone	AGBOVILLE, SIKENSI, TIASSALE
6.2 Context	<p>The Ivorian State has put in place a Strategic Poultry Recovery Plan (PSRA) for the period 2011-2020, worth around 150 billion CFA francs. This plan allowed Côte d'Ivoire to increase its poultry production from 67,715 tons (98.9% TC) in 2016 to 74,297 tons (98.8% TC) in 2019. However, the poultry industry suffers from a lack of slaughtering facilities that meet hygiene standards, conservation (cold chain) of livestock production and the proliferation of clandestine slaughtering. Thus, this project aims to build modern slaughterhouses that meet standards.</p>
6.3 Problem to be solved	Poor slaughter and storage conditions for poultry.
6.4 Purpose of the project	<ul style="list-style-type: none"> - Contribute to food and nutritional security; - Improve the quality of products by carrying out slaughter in good hygienic conditions; - Contribute to the preservation of the environment; - Guarantee the safety of meat delivered for consumption and reduce environmental pollution.
6.5 Economic profitability	Study in progress

Modern poultry slaughterhouse

INDUSTRIAL IRRIGATED CORN PLANTATION

1,270,000 Euro

CEPICI projects (Investments promotion agency of Côte d'Ivoire)

Industrial irrigated corn plantation

1. Project title	Industrial irrigated corn plantation
2. Type	Private
3. Sectors / Industry	Agro-industry / Corn
4. Promoter	CEPICI
5. Contacts	+ 225 27 20 311 400 / opportunités-projets@cepici.ci
6. Project description	
6.1 Execution zone	South and North Côte d'Ivoire
6.2 Context	<p>With an estimated production of 1.2 million tons in 2020 (BAD), corn is the second most cultivated cereal in Côte d'Ivoire in terms of volume, after rice. It is also the most important raw material in the manufacture of animal feed. Nowadays, with the growth of the livestock sector (poultry and pork in particular), as well as the development of breweries and the establishment of several corn-based flour manufacturing factories, the demand is becoming more and more significant and domestic production is no longer able to meet this demand. As a result, Côte d'Ivoire finds itself importing a significant quantity of corn.</p>
6.3 Problem to be solved	Insufficiency of national corn production
6.4 Purpose of the project	<ul style="list-style-type: none"> - Contributing to food and nutritional security - Increase local corn production - Supporting the livestock sector - Reduce the outflow of foreign currency linked to corn imports
6.5 Installed capacity	600 hectares
6.6 Economic profitability	Entre 9% et 23%

Industrial irrigated corn plantation

INDUSTRIAL CHILI PLANTATION FOR EXPORT

224,977 Euro

CEPICI projects (Investments promotion agency of Côte d'Ivoire)

Industrial chili plantation for export

1. Project title	Industrial chilli plantation for export
2. Type	Private
3. Sectors / Industry	Livestock / Chili
4. Promoter	CEPICI
5. Contacts	+ 225 27 20 311 400 / opportunités-projets@cepici.ci
6. Project description	
6.1 Execution zone	South-East of Côte d'Ivoire (AGBOVILLE, SIKENSI, TIASALE)
6.2 Context	Global chili production was estimated in 2012 by the FAO at over 31 million tons (FAO, 2014). With 500,000 and 110,000 tons per year, Nigeria and Ghana are the largest chili-producing countries in West Africa. In Côte d'Ivoire, with production estimated at 32,900 tons a year, chillies are, along with okra, tomatoes and eggplants, the main vegetables consumed and grown. With the development of the catering, pharmaceutical and cosmetics industries, worldwide demand for chillies is growing rapidly.
6.3 Problem to be solved	Strong growth in demand compared to production
6.4 Purpose of the project	Increase domestic chili production to meet growing demand.
6.5 Installed capacity	50 hectares
6.6 Economic profitability	Between 14% and 28%
7. Project components	Component 1: Construction of building Component 2: Purchase of materials and equipment Component 3: operation of the plantation

Industrial chili plantation for export

INDUSTRIAL PLANTAIN PLANTATION

1,416,259 EURO

CEPICI projects (Investments promotion agency of Côte d'Ivoire)

Industrial plantain plantation

1. Project title	Industrial plantain plantation
2. Type	Private
3. Sectors / Industry	Agro-industry / Plantain
4. Promoter	CEPICI
5. Contacts	+ 225 27 20 311 400 / opportunités-projets@cepici.ci
6. Project description	
6.1 Execution zone	AGBOVILLE, SIKENSI, TIISSALE
6.2 Context	In Côte d'Ivoire, the annual production of plantain is estimated at more than 1.7 million tons (CNRA), which makes it the third most cultivated food crop after yam and cassava. With the increase in population, the growth of the agro-industry sector and the development of the catering industry, the demand for plantain is growing.
6.3 Problem to be solved	Strong national and international demand for plantain in relation to production
6.4 Purpose of the project	<ul style="list-style-type: none"> - Increase plantain production for export - Contribute to food and nutritional security
6.5 Installed capacity	100 hectares
6.6 Economic profitability	Between 10% and 30%

Industrial plantain plantation

8. Indicative execution schedule		Year 1	Year 2	Year 3
	c1	X		
	c2	X

CASSAVA PROCESSING UNIT

68,598 Euro

CEPICI projects (Investments promotion agency of Côte d'Ivoire)

Cassava processing unit

1. Project title	Cassava processing unit
2. Type	Private
3. Sectors / Industry	Agro-industry / Cassava
4. Promoter	CEPICI
5. Contacts	+ 225 27 20 311 400 / opportunités-projets@cepici.ci
6. Project description	
6.1 Execution zone	South and central Côte d'Ivoire
6.2 Context	<p>Cassava is one of the main food crops in Côte d'Ivoire with annual production of five to six million tonnes and its consumption ranks second, after yam and ahead of rice. In addition, the eating habits of the African diaspora constitute a favorable market for the export of manufactured cassava products. Cassava is an agricultural good that can be easily transformed into a multitude of derived products that can be used for food, agropastoral or even industrial use. Identifying the commercial potential of its various derivative products and the jobs they could potentially generate is very important. Indeed, the list of manufactured by-products includes placali paste, dehydrated attiéké, cassava flour and cassava starch. Thus, setting up a cassava processing unit for these different products is a real investment opportunity.</p>
6.3 Problem to be solved	Low valuation of the cassava value chain
6.4 Purpose of the project	<ul style="list-style-type: none"> - Contribute to food and nutritional security - Promoting agricultural products from cassava
6.5 Installed capacity	1.5 tons per day
6.6 Economic profitability	Study in progress

Cassava processing unit

8. Indicative execution schedule		Year 1	Year 2	Year 3

RAW CASHEW NUT PROCESSING PLANT

11,929,878 Euro

CEPICI projects (Investments promotion agency of Côte d'Ivoire)

Raw Cashew Nut Processing Plant

1. Project title	Raw Cashew Nut Processing Plant
2. Type	Private
3. Sectors / Industry	Agro-industry / Cashew
4. Promoter	CEPICI
5. Contacts	+ 225 27 20 311 400 / opportunités-projets@cepici.ci
6. Project description	
6.1 Execution zone	Center and North of Côte d'Ivoire
6.2 Context	With national production estimated at over 1.040 million tons in 2022, Côte d'Ivoire is the world's leading producer of raw cashew nuts and third largest exporter of cashew kernels. However, the industry is still underdeveloped, with local processing of raw cashew nuts estimated at 21.25% in 2022. The government's objective is to achieve a 50% processing rate by 2030.
6.3 Problem to be solved	Existence of untapped potential in cashew processing
6.4 Purpose of the project	Increase the added value of the sector
6.5 Installed capacity	15,000 Tons
6.6 Economic profitability	Between 6% and 32%

Raw Cashew Nut Processing Plant

NATURAL RUBBER PROCESSING PLANT

33,536,585 Euro

CEPICI projects (Investments promotion agency of Côte d'Ivoire)

Natural rubber processing plant

1. Project title	Natural Rubber Latex Processing Plant
2. Type	Private
3. Sectors / Industry	Agro-industry / Rubber
4. Promoter	CEPICI
5. Contacts	+ 225 27 20 311 400 / opportunités-projets@cepici.ci
6. Project description	
6.1 Execution zone	Center and South of Côte d'Ivoire
6.2 Context	In Côte d'Ivoire, annual national rubber production passed the 1 million tons mark in 2021. Production in 2022 is estimated at over 1.2 million tons, making Côte d'Ivoire the leading African producer and 4th largest in the world. With a primary processing rate in the sector estimated at 80% in 2021, the government has set itself the target of achieving 100% primary processing in the sector by 2025.
6.3 Problem to be solved	<ul style="list-style-type: none"> - Existence of unexploited potential in the primary processing of rubber trees; - Second transformation of rubber tree almost unexploited.
6.4 Purpose of the project	Increase the added value of the sector
6.5 Installed capacity	70,000 Tons
6.6 Economic profitability	Between 24% and 34%

Natural rubber processing plant

8. Indicative execution schedule		Year 1	Year 2	Year 3
	C1	X

FROZEN PLANTAIN AND YAM CHIPS PRODUCTION UNIT

128,000 Euro

Private projects

Frozen plantain and yam chips production unit

1. Project title	Frozen plantain and yam chips production unit
2.Type	Private
3. Sectors / Industry	Agro-industry / Food industry
4. Promoter	CEPICI
5. Contacts	+ 225 27 20 311 400 / opportunités-projets@cepici.ci
6. Project description	
6.1 Execution zone	ANYAMA
6.2 Context	<p>Yam and plantain, Côte d'Ivoire's first and third largest food crops in by tonnage, have seen their markets expand considerably over the last twenty years as urbanization has taken hold. These two products are consumed in various forms in Côte d'Ivoire. However, these sectors face enormous challenges in terms of conservation and processing. The processing of plantain and yam into finished products (frozen chips), ready for consumption, is an innovative solution and an investment opportunity given the popularity of these products among the population.</p>
6.3 Problem to be solved	<ul style="list-style-type: none"> - Insufficient conservation and processing units for local products - Low value added to agricultural products - loss of production at large harvesting stations
6.4 Purpose of the project	<ul style="list-style-type: none"> - Adding value to agricultural products - Significantly reduce post-harvest losses - Contributing to food and nutritional security
6.5 Installed capacity	10,000 Tons per year
6.6 Economic profitability	See the developer

CASHEW NUT BIOFUEL AND FUEL PROCESSING UNIT

360,000 Euro

Private projects

Cashew nut biofuel and fuel processing unit

1. Project title	Cashew nut biofuel and fuel processing unit
2. Type	Private
3. Sectors / Industry	Agro-industry / Cashew
4. Promoter	CEPICI
5. Contacts	+ 225 27 20 311 400 / opportunités-projets@cepici.ci
6. Project description	
6.1 Execution zone	BOUAKE
6.2 Context	<p>The need for energy in sub-Saharan Africa, and in Côte d'Ivoire, in terms of fuels, is increasing with urbanization and demographic growth. Although the country has several fossil fuel distributors (gas, oil, charcoal), the massive use of these energies has harmful effects on the environment. Cashew nut cultivation in Côte d'Ivoire generates around 100,000 tons of cashew shells every year, a highly polluting material that is not recycled. So using cashew nuts to make biofuel is an innovative solution and an investment opportunity.</p>
6.3 Problem to be solved	<ul style="list-style-type: none"> - Environmental degradation linked to the use of fossil fuels - Low recycling of agricultural waste
6.4 Purpose of the project	<ul style="list-style-type: none"> - Increasing the production of green energy
6.5 Installed capacity	2460 Tons per year
6.6 Economic profitability	See the developer

PRODUCTION UNIT FOR FORTIFIED INFANT FLOUR MADE FROM LOCAL CEREALS

75,000 Euro

Private projects

Production unit for fortified infant flour made from local cereals

1. Project title	Production unit for fortified infant flour made from local cereals
2. Type	Private
3. Sectors / Industry	Agro-industry / Food industry
4. Promoter	CEPICI
5. Contacts	+ 225 27 20 311 400 / opportunités-projets@cepici.ci
6. Project description	
6.1 Execution zone	Yamoussoukro
6.2 Context	<p>In Côte d'Ivoire, malnutrition among young children and infants is a major public health problem. Indeed, international reports show that 21.9%, 13.4% and 7.3% of children under five are stunted, underweight and wasted respectively (UNICEF-WHO-The World Bank, 2018). This situation is because industrial supplementary foods for children (infant flour) sold in supermarkets and large retail chains are inaccessible to a large proportion of the population because they are imported and sold at very high prices. Traditional homemade infant flours, which are accessible to all, have very low nutritional value and cause problems of malnutrition and nutritional deficiencies.</p> <p>The creation of a fortified flour production unit based on local cereals is an investment opportunity.</p>
6.3 Problem to be solved	<ul style="list-style-type: none"> - Heavy dependence on flour imports - Poor quality of locally produced flour
6.4 Purpose of the project	<ul style="list-style-type: none"> - Reduce the outflow of foreign currency linked to large imports of infant formula flour. - Reducing infant mortality - Improving the quality of locally produced flour - Contribute to food and nutritional security
6.5 Installed capacity	37,800 Tons per year
6.6 Economic profitability	See the developer

PORK FARM

100,000 Euro

Private projects

Pork farm

1. Project title	Pork farm
2.Type	Private
3. Sectors / Industry	Livestock / Pig
4. Promoter	CEPICI
5. Contacts	+ 225 27 20 311 400 / opportunités-projets@cepici.ci
6. Project description	
6.1 Execution zone	ABIDJAN
6.2 Context	<p>Pork is one of the most widely consumed meats in the world. In 2020, global pork production was around 109 million tons, representing around 36% of total meat production worldwide. In Côte d'Ivoire, pork is highly prized by the population. Indeed, pork consumption requirements in Côte d'Ivoire are estimated at over 60,000 tons, while local production only covers 17% (FAO, 2020). Côte d'Ivoire therefore imports 83% of its pork consumption. setting up a pork farm is therefore an investment opportunity worth exploiting.</p>
6.3 Problem to be solved	<ul style="list-style-type: none"> - Heavy dependence on pork imports - Low level of local pork production in relation to the population's needs
6.4 Purpose of the project	<ul style="list-style-type: none"> - Contributing to food and nutritional security - Increase national pork production - Reduce foreign currency outflows linked to large imports of infant flour.
6.5 Installed capacity	236,000 kg per year
6.6 Economic profitability	See the developer

UNIT FOR PROCESSING **FRUITS** **AND VEGETABLES** INTO JAM, COSMETIC PRODUCTS AND SPICES

219,512 Euro

Private partner projects

Unit for processing fruits and vegetables into jam, cosmetic products and spices

1. Project title	Unit for processing fruits and vegetables into jam, cosmetic products and spices
2. Type	Private
3. Sectors / Industry	Agro-industry / Agri-food
4. Promoter	CEPICI
5. Contacts	+ 225 27 20 311 400 / opportunités-projets@cepici.ci
6. Project description	
6.1 Execution zone	South and North of Côte d'Ivoire
6.2 Context	Leading West African producer of fruits and vegetables for more than 20 years, Côte d'Ivoire loses on average 15% of its production per year and only processes 1%. This situation is due to an insufficiency of fruit and vegetable conservation and processing units at the local level. Thus, setting up a fruit and vegetable processing unit into jam, cosmetic products and spices is an investment opportunity. It will serve as support for several booming industries in Côte d'Ivoire (catering and cosmetics).
6.3 Problem to be solved	<ul style="list-style-type: none"> - Insufficiency of fruit and vegetable conservation and processing units - Loss of post-harvest production
6.4 Purpose of the project	<ul style="list-style-type: none"> - Contribute to food and nutritional security - Increase the added value of agricultural products
6.5 Installed capacity	18,000 tons per year
6.6 Economic profitability	See the developer

CREATION OF A RICE COMPLEX

2,482,561 Euro

Private projects

Creation of a rice complex in the center of the Côte d'Ivoire

1. Project title	Agro-industry / Rice farming
2. Type	Private
3. Sectors / Industry	Agro-industry / Rice farming
4. Promoter	CEPICI
5. Contacts	+ 225 27 20 311 400 / opportunités-projets@cepici.ci
6. Project description	
6.1 Execution zone	BOUAKE
6.2 Context	In Africa, rice represents one of the most important food crops, where economic activities linked to the value chain are widely considered as a factor of economic development. In Côte d'Ivoire, rice imports are experiencing strong growth despite the potential for increased local production. Nearly 80% of paddy rice is processed in Côte d'Ivoire but using almost artisanal techniques, which results in below-average quality. Faced with these constraints, the Ivorian State has set itself the ambition of increasing production and local processing capacities. The Government also plans to strengthen the availability of Ivory rice on the national market by increasing the proportion of local rice marketed nationally from 60% in 2021 to 95% in 2025 and achieve self-sufficiency in rice by 2030.
6.3 Problem to be solved	<ul style="list-style-type: none"> - Insufficient local rice production - Little developed rice processing techniques
6.4 Purpose of the project	<ul style="list-style-type: none"> - Improve local rice production - Reduce foreign exchange outflows linked to rice imports - Contribute to income and added value - Contribute to job creation
6.5 Installed capacity	6000 hectares
6.6 Economic profitability	See the developer
